Consortium Customers Save \$2,838,785 on their Electric Bills in June/July

Consortium customers expected to save over \$25 million through May 2013

Comparing ComEd's current rate to the North Shore Electricity Aggregation Consortium's ("Consortium") Supply Rate, the Consortium is pleased to announce that customers in the Consortium's program have **saved \$2,838,785 during the months of June/July**. Using a historical comparison of electricity use of the Consortium's customers, it is anticipated that from **June 2012 to May 2013 Consortium customers will save over \$25 million** off the supply charge on their electric bill. This substantial savings clearly represents the positive impacts the Electricity Aggregation process has brought to all eight member communities.

The Consortium encourages its residents to stay informed about the aggregation process. All Consortium communities have received phone calls from residents indicating that other energy suppliers have solicited their businesses and may be representing themselves as the Consortium's provider. The Consortium will only communicate with our residents and businesses through official letterhead or on our official websites and will not make phone calls soliciting business. If you are concerned about phone calls that you are receiving, contact the Illinois Commerce Commission at 1-800-524-0795. The Illinois Commerce Commission is the regulating body of all electric suppliers in Illinois.
