

**PREAMBLE**  
to  
**NOTICE OF INTENT FOR NEW OR RENEWAL OF GENERAL PERMIT FOR DISCHARGES  
FROM SMALL MUNICIPAL SEPARATE STORM SEWER SYSTEMS - MS4S**  
describing  
**LAKE COUNTY'S COUNTYWIDE APPROACH  
TO STORMWATER MANAGEMENT**  
and  
**THE LAKE COUNTY STORMWATER MANAGEMENT COMMISSION'S ROLE  
AS A QUALIFYING LOCAL PROGRAM**

The Lake County Stormwater Management Commission (SMC) was established by the Lake County Board in 1991. It succeeded the Lake County Stormwater Management Planning Committee, which was established in 1988 following the passage of enabling legislation by the Illinois General Assembly (55 ILCS 5/5-1062) in 1987. SMC's mission is to provide desired community services toward the primary goals of flood damage reduction and surface water quality improvement. The specific objectives that SMC is working to meet in order to achieve its primary goals of flood damage reduction and surface water quality improvement include: mitigate existing flood damages and prevent the occurrence of new damages in the future; repair, restore, maintain, and preserve natural and constructed drainage features and facilities in the county; improve surface water quality; promote awareness and understanding of stormwater management issues; and, establish, maintain, and distribute stormwater management data and information.

In working toward meeting these objectives, SMC follows a set of stormwater management policies that were created to define its roles and responsibilities for stormwater management in Lake County. These policies include: work to coordinate actions with municipalities and local county agencies to ensure efficient implementation of stormwater management activities; work interactively with partners in stormwater management across the county; provide direct technical services to local governments, agencies, and other groups to most effectively address regional, watershed, and interjurisdictional problems; provide public information, education, and training opportunities regarding stormwater management and raise awareness and capabilities throughout the county; and, facilitate local community input into local, federal, and state sponsored stormwater management activities across the county. The implementation of these policies has created a comprehensive, countywide approach to stormwater management in Lake County.

Consistent with this comprehensive, countywide approach to stormwater management, SMC serves as a Qualifying Local Program (QLP) for Municipal Separate Storm Sewer Systems (MS4s) in Lake County. As a QLP, SMC has been working since the early 2000's, when the Illinois Environmental Protection Agency (IEPA) began the process of expanding its NPDES Stormwater Program to include small MS4s, to assist Lake County MS4s in developing and implementing efficient and effective stormwater management programs.

In 2002, SMC proactively formed the Municipal Advisory Committee (MAC) to provide a forum for representatives of local MS4s, which include municipalities, townships, and drainage districts, to discuss, among other topics, the implementation of IEPA's NPDES Stormwater Program. At that time, as a result of conversations held at MAC meetings, informational workshops, and roundtable discussions, it was agreed that each Lake County MS4 would be responsible for obtaining coverage under IEPA's General NPDES Permit No. ILR40, through the submittal of a "Notice of Intent" to be covered under the permit,

and for developing its own local stormwater management program, but that each MS4 could and should take credit for the stormwater management activities conducted by SMC.

Although SMC is not itself an MS4, as it does not own or operate a separate storm sewer system, it does perform activities related to each of the six minimum control measures (MCMs) described in IEPA's General NPDES Permit No. ILR40. These activities include:

- 1. Public Education and Outreach:** SMC distributes throughout Lake County a variety of informational materials related to stormwater management via its "take away" rack and website; provides, upon request, informational materials directly to Lake County MS4s for local distribution; provides educational presentations related to IEPA's NPDES Stormwater Program at MAC meetings and, upon request, to local MS4s; includes announcements related to IEPA's NPDES Stormwater Program on its website, in its newsletter, and in its annual report; with the assistance of the Lake County Division of Transportation, posts watershed identification signage throughout the county; sponsors or co-sponsors numerous workshops and events on a variety of stormwater management-related topics; develops and compiles, upon request, stormwater materials for inclusion in stormwater education kits; provides, upon request, information on, materials for, and training on storm drain stenciling; and, maintains a webpage dedicated to IEPA's Stormwater Program with resource materials such as model ordinances, case studies, and web links.
- 2. Public Participation/Involvement:** SMC conducts a number of public meetings each year, including MAC meetings and watershed committee meetings, where IEPA's NPDES Stormwater Program and its stormwater management activities are discussed, providing public notice of such meetings on its website and through direct mailings and e-mailings.
- 3. Illicit Discharge Detection and Elimination:** SMC provides model and example illicit discharge ordinances that prohibit all non-stormwater discharges to the storm sewer system; continues to administer and enforce the Lake County Watershed Development Ordinance (WDO), which includes provisions that prohibit illicit discharges to the storm sewer system during construction on development sites; and, sponsors or co-sponsors workshops on Illicit Discharge Detection and Elimination or other topics related to IEPA's NPDES Stormwater Program.
- 4. Construction Site Runoff Control:** SMC continues to administer and enforce the Lake County Watershed Development Ordinance (WDO), which establishes the minimum stormwater management requirements for development in Lake County, including requirements for construction site runoff control; administers the Designated Erosion Control Inspector (DECI) program, which was designed to help ensure that the construction site runoff control requirements of the Lake County WDO are met; provides training for those involved in the administration and enforcement of the Lake County WDO to help ensure that the construction site runoff control requirements of the Lake County WDO are met; follows established procedures for the receipt and consideration of construction site runoff control-related information submitted by the public; and, conducts or coordinates inspections of development sites to help ensure that the construction site runoff control requirements of the Lake County WDO are met.
- 5. Post-Construction Runoff Control:** SMC continues to administer and enforce the Lake County Watershed Development Ordinance, which establishes the minimum stormwater management requirements for development in Lake County, including requirements for post-construction runoff control; provides training for those involved in the administration and enforcement of the Lake County WDO to help ensure that the post-construction runoff control requirements of the Lake County WDO are met; conducts or coordinates inspections of development sites to help

ensure that the post construction site runoff control requirements of the Lake County WDO are met; and, through its Watershed Management Board (WMB), provides partial funding for post-construction runoff control projects, including flood damage reduction and surface water quality improvement projects.

6. **Pollution Prevention/Good Housekeeping:** SMC maintains a list of known employee training resources and opportunities; makes available to Lake County MS4s a software-based employee training program; and, sponsors or co-sponsors training workshops related to pollution prevention/good housekeeping or other topics related to IEPA's NPDES Stormwater Program.

In addition to the stormwater management activities described above, SMC also provides, upon request, no-cost "consultant-level" technical assistance to Lake County MS4s in developing and implementing their stormwater management programs and provides them with a variety of resources to assist them in meeting the requirements of IEPA's General NPDES Permit No. ILR40. To date, these resources have included:

- Notice of Intent templates;
- Stormwater Management Program Plan templates;
- Annual Report templates;
- Annual "State of Lake County's Waters" reports;
- An Illicit Discharge Detection and Elimination guidance manual;
- Model and example illicit discharge ordinances that prohibit all non-stormwater discharges, including illegal dumping, to the storm sewer system;
- GIS and mapping data, including a countywide receiving waters map; and
- The Lake County Watershed Development Ordinance, which establishes the minimum stormwater management requirements for development in Lake County, including requirements for construction site and post-construction runoff control.

As IEPA's Stormwater Program continues to evolve, SMC is committed to providing continued and ongoing support to Lake County MS4s as they continue to develop and implement their stormwater management programs.

## Notice of Intent for New or Renewal of General Permit for Discharges from Small Municipal Separate Storm Sewer Systems - MS4's

### Part I. General Information

- 1. MS 4 Operator Name: Village of Deerfield
- 2. MS4 Mailing Address: 850 Waukegan Road  
 City: Deerfield State: IL
- 3. Operator Type: Village Other: \_\_\_\_\_
- 4. Operator Status: Local Other: \_\_\_\_\_

5. Name(s) of governmental entity(ies) in which MS4 is located:

~~Lake County~~

~~Cook County~~

6. Area of land that drains to your MS4 in square miles: 7

7. Latitude and Longitude at approximate geographical center of MS4 for which you are requesting authorization to discharge:

Latitude:				Longitude:			
<u>42</u>	<u>11</u>	<u>12N</u>		<u>87</u>	<u>48</u>	<u>12</u>	
<u>Degrees</u>	<u>Minutes:</u>	<u>Seconds:</u>		<u>Degrees:</u>	<u>Minutes:</u>	<u>Seconds:</u>	

8. Name(s) of known receiving waters

Middle Fork Chicago River

West Fork Chicago River

RECEIVED  
MAR 10 2015

9. Persons responsible for implementation or coordination of Stormwater Management Program:

Name: Barbara K. Little, P.E. Title: Director of Public Works & Engineering Phone: 847-317-2490

Area of Responsibility: Watershed Development Ordinance

Name: Robert Phillips Title: Assistant Director of Public Works & Engineering Phone: 847-317-2490

Area of Responsibility: Watershed Development Ordinance

Part II. Best Management Practices (include shared responsibilities) which have been implemented or are proposed to be implemented in the MS4 area:

**A. Public Education and Outreach**

**Qualifying Local Programs (include shared responsibilities)**

The Village of Deerfield intends to share responsibility for the implementation of its stormwater management program with a Qualifying Local Program (QLP), as outlined below.

Please note that the current version of the Illinois Environmental Protection Agency's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that the Illinois Environmental Protection Agency (IEPA) will make to the new version of the Permit, both the QLP and the MS4 remain committed to performing activities related to each of the six MCMs described in the current version of the Permit.

**Qualifying Local Program:**

The Lake County Stormwater Management Commission (SMC) serves as a QLP for Lake County MS4s. As a QLP, SMC performs activities related to each of the six MCMs described in the Permit, including activities related to Public Education and Outreach. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of activities related to the Public Education and Outreach MCM, as described in Attachment A.

**MS4 Stormwater Management Program:**

As part of its stormwater management program, the Village of Deerfield conducts a number of Public Education and Outreach activities that educate and inform the public about the impacts of stormwater runoff on receiving water bodies and the steps that the public can take to reduce those impacts. In coordination and collaboration with the QLP, the Village of Deerfield utilizes a variety of best management practices (BMPs) to educate and inform the public about these issues, including: distributing of educational materials to the community or conducting equivalent outreach activities about the impacts of stormwater discharges on water bodies and steps that the public can take to reduce those impacts; supporting classroom education; supporting storm drain stenciling efforts; and, supporting SWALCO events. Following the expiration of the current version of the Permit on March 31, 2014, the Village of Deerfield plans to continue to perform a variety of activities related to the Public Education and Outreach MCM, as described in Attachment B.

**MS4 Goals (include shared responsibilities)**

- ✓  A.1 Distributed Paper Material
- A.2 Speaking Engagement
- ✓  A.3 Public Service Announcement
- ✓  A.4 Community Event
- ✓  A.5 Classroom Education Material
- ✓  A.6 Other Public Education

## B. Public Participation/Involvement

Measurable Goals (include shared responsibilities)

Qualifying Local Programs:

The Village of Deerfield intends to share responsibility for the implementation of its stormwater management program with a Qualifying Local Program (QLP), as outlined below.

Please note that the current version of the Illinois Environmental Protection Agency's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that the Illinois Environmental Protection Agency (IEPA) will make to the new version of the Permit, both the QLP and the MS4 remain committed to performing activities related to each of the six MCMs described in the current version of the Permit.

Qualifying Local Program:

The Lake County Stormwater Management Commission (SMC) serves as a QLP for Lake County MS4s. As a QLP, SMC performs activities related to each of the six MCMs described in the Permit, including activities related to Public Participation/Involvement. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of activities related to the Public Participation/Involvement MCM, as described in Attachment A.

MS4 Stormwater Management Program:

As part of its stormwater management program, the Village of Deerfield conducts a number of Public Participation/Involvement activities that involve and engage the public in the implementation of its stormwater management program. In coordination and collaboration with the QLP, the Village of Deerfield utilizes a variety of best management practices (BMPs) to involve and engage the public in these efforts, including: maintaining a process for receiving and processing citizen input; attending and publicizing stakeholder meetings; presenting program information at a public meeting at least once annually; and, publicizing IDDE reporting contact numbers. Following the expiration of the current version of the Permit on March 31, 2014, the Village of Deerfield plans to continue to perform a variety of activities related to the Public Participation/Involvement MCM, as described in Attachment B.

### QLP MS4

- B.2 Educational Volunteer
- ✓  B.3 Stakeholder Meeting
- ✓  B.4 Public Hearing
- B.5 Volunteer Monitoring
- ✓  B.6. Program Involvement
- ✓  B.7 Other Public Involvement

### C. Illicit Discharge Detection and Elimination

#### Measurable Goals (include shared responsibilities)

The Village of Deerfield intends to share responsibility for the implementation of its stormwater management program with a Qualifying Local Program (QLP), as outlined below. Note, however, that the primary responsibility for the implementation of the Illicit Discharge Detection and Elimination MCM lies with the Village of Deerfield.

Please note that the current version of the Illinois Environmental Protection Agency's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that the Illinois Environmental Protection Agency (IEPA) will make to the new version of the Permit, both the QLP and the MS4 remain committed to performing activities related to each of the six MCMs described in the current version of the Permit.

#### Qualifying Local Program:

The Lake County Stormwater Management Commission (SMC) serves as a QLP for Lake County MS4s. As a QLP, SMC performs activities related to each of the six MCMs described in the Permit, including activities related to Illicit Discharge Detection and Elimination. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of activities related to the Illicit Discharge Detection and Elimination MCM, as described in Attachment A.

#### MS4 Stormwater Management Program:

As part of its stormwater management program, the Village of Deerfield conducts a number of activities related to Illicit Discharge Detection and Elimination. In accordance with the current version of the Permit, the Village of Deerfield's Illicit Discharge Detection and Elimination program includes: sewer map preparation; adopting regulatory control ordinances; implementing a detection/elimination prioritization plan; implementing illicit discharge tracing procedures; implementing illicit source removal procedures; periodically evaluating and assessing the program; implementing a dry weather screening program; and, notifying the public.

Following the expiration of the current version of the Permit on March 31, 2014, the Village of Deerfield plans to continue to perform a variety of activities related to the Illicit Discharge Detection and Elimination MCM, as described in Attachment B.

#### Measurable Goals (include shared responsibilities)

QLP MS4

- C.1 Sewer Map Preparation
- ✓  C.2 Regulatory Control Program
- C.3 Detection/Elimination Prioritization Plan
- C.4 Illicit Discharge Tracing Procedures
- C.5 Illicit Source Removal Procedures
- C.6 Program Evaluation and Assessment
- C.7 Visual Dry Weather Screening
- C.8 Pollutant Field Testing
- C.9 Public Notification
- C.10 Other Illicit Discharge Controls

## D. Construction Site Runoff Control

Measurable Goals (include shared responsibilities)

Qualifying Local Programs:

Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County. The WDO, which is administered and enforced within the Village of Deerfield by the MS4, establishes standards for Construction Site Runoff Control.

Although the Village of Deerfield intends to share responsibility for the implementation of its stormwater management program with a Qualifying Local Program (QLP), as outlined below, the primary responsibility for the implementation of the Construction Site Runoff Control MCM lies with the MS4, as the Village of Deerfield is currently a Certified Community, as defined by the WDO.

Please note that the current version of the Illinois Environmental Protection Agency's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that the Illinois Environmental Protection Agency (IEPA) will make to the new version of the Permit, both the QLP and the MS4 remain committed to performing activities related to each of the six MCMs described in the current version of the Permit.

Qualifying Local Program:

The Lake County Stormwater Management Commission (SMC) serves as a QLP for Lake County MS4s. As a QLP, SMC performs activities related to each of the six MCMs described in the current version of the Permit, including activities related to Construction Site Runoff Control. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of activities related to the Construction Site Runoff Control MCM, as described in Attachment A.

MS4 Stormwater Management Program:

In accordance with the current version of the Permit, the Village of Deerfield has developed and implemented a Construction Site Runoff Control program to reduce the amount of pollution contained in construction stormwater runoff that enters the Village of Deerfield's storm sewer system from development sites. The Village of Deerfield has adopted the Lake County WDO and is currently certified by SMC to administer and enforce the provisions of the WDO. The Village of Deerfield's designated Enforcement Officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO within the Village of Deerfield. Following the expiration of the current version of the Permit on March 31, 2014, the Village of Deerfield plans to continue to perform a variety of activities related to the Construction Site Runoff Control MCM, as described in Attachment B.

Note: Certified communities have shared responsibility with SMC, the QLP, under BMPs D.1, D.2, D.3, D.4, D.5, and D.6.

### QLP MS4

- ✓  D.1 Regulatory Control Program
- ✓  D.2 Erosion and Sediment Control BMPs
- ✓  D.3 Other Waste Control Program
- ✓  D.4 Site Plan Review Procedures
- ✓  D.5 Public Information Handling Procedures
- ✓  D.6 Site Inspection/Enforcement Procedures
- D.7 Other Construction Site Runoff Controls

Measurable Goals (include shared responsibilities)

As described above, Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County. The WDO, which is administered and enforced within the Village of Deerfield by the Village of Deerfield, establishes standards for Post-Construction Runoff Control.

Although the Village of Deerfield intends to share responsibility for the implementation of its stormwater management program with a Qualifying Local Program (QLP), as outlined below, the primary responsibility for the implementation of the Post-Construction Runoff Control MCM lies with the Village of Deerfield, as the Village of Deerfield is currently a Certified Community, as defined by the WDO.

Please note that the current version of the Illinois Environmental Protection Agency's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that the Illinois Environmental Protection Agency (IEPA) will make to the new version of the Permit, both the QLP and the MS4 remain committed to performing activities related to each of the six MCMs described in the current version of the Permit.

Qualifying Local Program:

The Lake County Stormwater Management Commission (SMC) serves as a QLP for Lake County MS4s. As a QLP, SMC performs activities related to each of the six MCMs described in the current version of the Permit, including activities related to Post-Construction Runoff Control. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of activities related to the Post-Construction Runoff Control MCM, as described in Attachment A.

MS4 Stormwater Management Program:

In accordance with the current version of the Permit, the Village of Deerfield has developed and implemented a Post-Construction Runoff Control program to reduce the amount of pollution contained in post-construction stormwater runoff that enters the Village of Deerfield's storm sewer system from development sites. The Village of Deerfield has adopted the Lake County WDO and is currently certified by SMC to administer and enforce the provisions of the WDO. The Village of Deerfield's designated Enforcement Officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO within the Village of Deerfield. Following the expiration of the current version of the Permit on March 31, 2014, the Village of Deerfield plans to continue to perform a variety of activities related to the Post-Construction Runoff Control MCM, as described in Attachment B.

Note: Certified communities have shared responsibility with SMC, the QLP, under BMPs E.2, E.3, E.4, E.5, E.6, and E.7.

Measurable Goals (include shared responsibilities)

QLP MS4

- E.1 Community Control Strategy
- ✓  E.2 Regulatory Control Program
- ✓  E.3 Long Term O & M Procedures
- ✓  E.4 Pre-Construction Review of BMP Designs
- ✓  E.5 Site Inspections During Construction
- ✓  E.6 Post-Construction Inspections
- ✓  E.7 Other Post-Construction Runoff Controls

## F. Pollution Prevention/Good Housekeeping

Measurable Goals (include shared responsibilities)

Qualifying Local Programs:

The Village of Deerfield intends to share responsibility for the implementation of its stormwater management program with a Qualifying Local Program (QLP), as outlined below. Note, however, that the primary responsibility for the implementation of the Pollution Prevention/Good Housekeeping MCM lies with the Village of Deerfield.

Please note that the current version of the Illinois Environmental Protection Agency's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that the Illinois Environmental Protection Agency (IEPA) will make to the new version of the Permit, both the QLP and the MS4 remain committed to performing activities related to each of the six MCMs described in the current version of the Permit.

Qualifying Local Program:

The Lake County Stormwater Management Commission (SMC) serves as a QLP for Lake County MS4s. As a QLP, SMC performs activities related to each of the six MCMs described in the current version of the Permit, including activities related to Pollution Prevention/Good Housekeeping. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of activities related to Pollution Prevention/Good Housekeeping, as described in Attachment A.

MS4 Stormwater Management Program:

In accordance with the current version of the Permit, the Village of Deerfield has developed and implemented a Pollution Prevention/Good Housekeeping program to reduce the amount of pollution generated by municipal activities and operations. The program includes: the evaluation and improvement of municipal policies and procedures to reduce the discharge of pollutants from municipal activities and operations; and, a training program for municipal employees. Following the expiration of the current version of the Permit on March 31, 2014, the Village of Deerfield plans to continue to perform a variety of activities related to the Pollution Prevention/Good Housekeeping MCM, as described in Attachment B.

QLP MS4

- ✓  F.1 Employee Training Program
- F.2 Inspection and Maintenance Program
- F.3 Municipal Operations Storm Water Control
- F.4 Municipal Operations Waste Disposal
- ✓  F.5 Flood Management/Assess Guidelines
- F.6 Other Municipal Operations Controls

Part III. Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for knowingly submitting false information, including the possibility of fines and imprisonment.

Any person who knowingly makes a false, fictitious, or fraudulent material statement, orally or in writing, to the Illinois EPA commits a Class 4 felony. A second or subsequent offense after conviction is a Class 3 felony (415 ILCS 5/44 (h)).

BOWWPC/PERMIT SECTION

**ATTACHMENT A**  
**SUMMARY OF PROPOSED QLP STORMWATER MANAGEMENT ACTIVITIES**

The Lake County Stormwater Management Commission (SMC) serves as a Qualifying Local Program (QLP) for Municipal Separate Storm Sewer Systems (MS4s) in Lake County. As a QLP, SMC has been working since the early 2000's, when the Illinois Environmental Protection Agency (IEPA) began the process of expanding its NPDES Stormwater Program to include small MS4s, to assist Lake County MS4s in developing and implementing efficient and effective stormwater management programs.

Although SMC is not itself an MS4, as it does not own or operate a separate storm sewer system, it does perform activities related to each of the six minimum control measures (MCMs) described in IEPA's General NPDES Permit No. ILR40. Please note that the current version of IEPA's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that IEPA will make to the new version of the Permit, SMC remains committed to performing activities related to the six MCMs described in the current version of the Permit. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of stormwater management activities, as described in more detail below.

**A. Public Education and Outreach**

SMC will continue to support Lake County MS4s in the development and implementation of their stormwater management programs by performing activities related to the Public Education and Outreach MCM, as described below.

**A.1 Distributed Paper Material**

SMC compiles, develops, and distributes throughout Lake County a variety of materials related to stormwater management. SMC has produced a number of pamphlets and brochures related to stormwater management and prepares a quarterly newsletter, "Mainstream," as well as an Annual Report, which highlight successful stormwater management activities conducted throughout Lake County. SMC also prepares project fact sheets that provide information about ongoing and recently completed stormwater management projects. In addition, SMC has developed or collaborated on a number of manuals related to stormwater management, such as "Riparian Areas Management: A Citizen's Guide," "A Citizen's Guide to Maintaining Stormwater Best Management Practices," and the "Streambank Stabilization Manual," and will continue to develop or collaborate on such manuals or manual updates on an as-needed basis.

*Measurable Goal(s):*     Distribute informational materials from "take away" rack at SMC.  
                                  Upon request, distribute informational materials directly to Lake County  
                                  MS4s for local distribution.

*Milestone(s):*            SMC began implementation of this BMP in March 2003 and will continue to  
                                  implement it on an annual basis.

**A.2 Speaking Engagement**

SMC provides educational presentations related to IEPA's NPDES Stormwater Program on a regular basis at Municipal Advisory Committee (MAC) meetings. Upon request, SMC will provide educational presentations related to IEPA's NPDES Stormwater Program to Lake County MS4s.

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **A.4 Community Event**

When possible, the Village of Deerfield attends and/or sponsors outreach events and scheduled meetings with the general public. These events are held on an as needed or as requested basis. Audiences may include the homeowners associations, lake associations, businesses, and neighborhood groups. Periodically, the Lake County Storm Water Commission hosts or co-hosts workshops for the general public that focus on specific storm water topics. These workshops typically discuss storm water topics currently of interest within the County. They offer the opportunity to share information and to facilitate a collective focus on potential solutions to the challenges faced by the County, Villages, and other stakeholders. The Village of Deerfield publicizes these events on the website.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **A.6 Other Public Education**

The Village of Deerfield's website includes storm water quality specific elements. The website gives information regarding water quality, solid waste and hazardous material, storm water, and general environmental health. The website is updated by the Village staff and is tracked for hits. A significant amount of information is made available through links to other educational and informational sites.

The Village of Deerfield provides the public with the following educational information: proper disposal of household hazardous wastes; information about the Solid Waste Agency of Lake County (SWALCO); septic system maintenance; vehicle fluid maintenance; car washing; and, pool dewatering.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **B. Public Participation and Involvement**

The public participation and involvement program allows input from citizens during the development and implementation of the SWMP. The SWMP should be evaluated annually. Major highlights and deficiencies should be noted annually, and the Program revised accordingly on a minimum 5-yr basis, or as necessary.

#### **B.3 Stakeholder Meeting**

The Village of Deerfield participates, and encourages the participation of local stakeholders, in Lake County Stormwater Management Commission and other sponsored watershed planning events. The Village will adopt watershed plans per the direction and in coordination with the LCSMC.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **B.4 Public Hearing**

Prior to the acceptance of the SWMP, the draft document was presented to the Village Board during a public hearing on November 16, 2009. Comments on the SWMP are continually accepted through the Village website, phone calls, or other means. Comments are evaluated for inclusion and incorporated into the next revision of the SWMP as deemed appropriate.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **B.7 Other Public Involvement**

The Village of Deerfield maintains, operates and publicizes a phone number where parties can contact the Village with environmental concerns. Complaints, suggestion, and request calls are screened, logged and routed to the appropriate individual for action. General program related calls are directed to the Village Manager, or designee. Construction activity, illicit discharge, storm sewer, and other related storm water runoff concerns are directed to the appropriate persons of the Public Works and Engineering Departments. The Village also maintains a website which enables and encourages the public to contact the Village with any concerns. Primary advertisement venues include the website and other municipal publications. Telephone calls received from residents, internal Village departments, and other agencies are tracked. Records of phone calls should be reviewed annually to determine if trends can be seen and if there is additional outreach efforts needed.

The Village of Deerfield participates in MAC meetings and events hosted by the Qualifying Local Program (QLP). The MAC is a countywide, collaborative standing committee of the SMC. The MAC is a forum for local government representatives to discuss inter-jurisdictional issues and projects, make recommendations to the Technical Advisory Committee on Lake County Watershed Development Ordinance administration, and to serve as a resource to assist local representatives in maintaining the most current standards for storm water regulations. MAC meetings also serve as a forum for Lake County's NPDES Phase II program.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **C. Illicit Discharge Detection and Elimination**

As part of its stormwater management program, the Village of Deerfield conducts a number of activities related to Illicit Discharge Detection and Elimination. In accordance with the current version of the Permit, the Village of Deerfield's Illicit Discharge Detection and Elimination program includes:

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s  
Summary of Proposed MS4 Stormwater Management Activities

- Sewer map preparation;
- Adopting regulatory control ordinances;
- Implementing a detection/elimination prioritization plan;
- Implementing illicit discharge tracing procedures,
- Implementing illicit source removal procedures,
- Periodically evaluating and assessing the program,
- Implementing a dry weather screening program, and
- Notifying the public.

**C.1 Sewer Map Preparation**

The Village of Deerfield has created a Storm Sewer Atlas and Outfall Inventory Map. These maps are used to help determine the extent of discharged dry weather flows, the possible sources of the dry weather flows, and the particular water bodies these flows may be affecting. The outfall locations have been numbered to facilitate detection and tracking of identified illicit discharges. The outfall inventory map can be obtained from the Village Public Works Department. The outfall map should be revised annually to incorporate permitted outfalls associated with new developments. Outfalls shall be inspected annually for detection of non-storm water discharges and illegal dumping.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

**C.2 Regulatory Control Program**

The Watershed Development Ordinance (WDO) includes provisions that prohibit illicit discharges to the storm sewer system during construction (i.e., prior to final site stabilization) on development sites. The WDO allows the Village of Deerfield to require inspection deposits, performance bonds, and to adopt and enforce violation procedures. These allowances assist the Village in achieving compliant construction sites.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP. Enforce WDO.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

**C.3 Detection/Elimination Prioritization Plan**

The Village of Deerfield has developed and implemented a plan to detect and address all non-stormwater discharges, including illegal dumping, into the storm sewer system. Methods used to detect illicit discharges include periodic visual dry weather screening, employee reporting, and public reporting. Outfalls with suspicious discharges are assessed to determine whether or not flow is observed and whether or not any indicators of an illicit discharge are present. The results of each inspection are recorded on a form, and based on such results, appropriate follow-up actions are prescribed. Such follow-up actions may include additional inspections, additional water quality sampling and analysis, source tracking, and source removal. Follow-up activities are generally prioritized based on the scope and magnitude of the associated illicit discharge.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **C.4 Illicit Discharge Tracing Procedures**

The Village of Deerfield has developed procedures for tracking illicit discharges to their source. Methods that can be used to track illicit discharges to their source include drainage area investigations, storm sewer network investigations, and on-site investigations, which may involve smoke testing, dye testing, and/or video inspection to pinpoint the exact source of an illicit discharge. When an illicit discharge is identified, appropriate source tracking procedures are selected and used to track the discharge to its source.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **C.5 Illicit Source Removal Procedures**

The Village of Deerfield has developed procedures for removing illicit discharges from the storm drain system once they have been tracked to their source. These procedures generally include: using an independent third-party to confirm the presence of an illicit discharge; notifying the landowner of the presence of an illicit discharge; requesting and conducting a site inspection with the landowner to pinpoint the source of the illicit discharge and to identify potential remedial actions; notifying the landowner of the need to take corrective action; and, if necessary, enforcing the provisions of the illicit discharge ordinance to have the illicit discharge removed from the storm sewer system.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **C.6 Program Evaluation and Assessment**

The Village of Deerfield periodically evaluates and assesses the effectiveness of its Illicit Discharge Detection and Elimination program. This evaluation is generally based on the results of the Village of Deerfield's visual dry weather screening program and on the number of non-stormwater discharges and illegal dumping incidents identified through both employee and public reporting. If the Village of Deerfield's Illicit Discharge Detection and Elimination program is effective, it is logical to assume that, over time, the number of non-stormwater discharges and illegal dumping incidents identified through visual dry weather screening, employee reporting, and public reporting will decline.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **C.7 Visual Dry Weather Screening**

In accordance with the current version of the Permit, the Village of Deerfield conducts periodic inspections of storm sewer outfalls for detection of non-stormwater discharges and illegal dumping. During such inspections, outfalls are assessed to determine whether or not flow is observed and whether or not any indicators of an illicit discharge are present. The results of each inspection are recorded on a form, and based on such results, appropriate follow-up actions are prescribed. Such follow-up actions may include additional inspections, additional water quality sampling and analysis, source tracking, and source removal. Follow-up activities are generally prioritized based on the scope and magnitude of the associated illicit discharge.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **C.9 Public Notification**

The Village of Deerfield provides and publicizes a phone number that the public can use to submit information about stormwater-related problems and concerns. The Village of Deerfield documents and tracks the resolutions of problems and complaints reported by the public, including reports of illicit discharges and illegal dumping.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **D. Construction Site Runoff Control**

Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County. The WDO, which is administered and enforced within the Village of Deerfield by the MS4, establishes standards for Construction Site Runoff Control. Although the Village of Deerfield intends to share responsibility for the implementation of the Construction Site Runoff Control MCM with the QLP, as outlined in this NOI, the primary responsibility for the implementation of the Construction Site Runoff Control MCM lies with the MS4, as the Village of Deerfield is currently a Certified Community, as defined by the WDO.

#### **D.1 Regulatory Control Program**

The WDO is the regulatory mechanism that requires the use of soil erosion and sediment controls on development sites throughout Lake County. The soil erosion and sediment control provisions of the WDO are included in Article IV, Section B.1.j. of the ordinance. At a minimum, these standards apply to any development project that hydrologically disturbs 5,000 square feet of land or more. As a Certified Community, the Village of Deerfield is responsible for the administration and enforcement of the WDO within the Village of Deerfield.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP. Enforce WDO.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **D.2 Erosion and Sediment Control BMPs**

Article IV, Section B.1.j of the WDO specifies the soil erosion and sediment control measures that must be used in conjunction with any land disturbing activities conducted on a development site. It specifies the use of a variety of soil erosion and sediment control BMPs including: minimize soil disturbance; protect adjoining properties from erosion and sedimentation; complete installation of soil erosion and sediment control features prior to commencement of hydrologic disturbance; stabilize disturbed areas within 7 days of active disturbance; avoid disturbance of streams whenever possible; use controls that are appropriate for the size of the tributary drainage area; protect functioning storm sewers from sediment; prevent sediment from being tracked onto adjoining streets; limit earthen embankments to slopes of 3H:1V; identify soil stockpile areas; and utilize statewide standards and specifications as guidance for soil erosion and sediment control. As a Certified Community, the Village of Deerfield is responsible for the administration and enforcement of the WDO within the Village of Deerfield.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP. Enforce WDO.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **D.3 Other Waste Control Program**

Article IV, Section B.1.j of the WDO includes provisions related to the control of waste and debris during construction on development sites. As a Certified Community, the Village of Deerfield is responsible for the administration and enforcement of the WDO within the Village of Deerfield.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP. Enforce WDO.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **D.4 Site Plan Review Procedures**

A community's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO. Within certified communities (i.e., communities certified by SMC to administer and enforce the provisions of the WDO), responsibility for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO lies with the MS4; within non-certified communities, the designated enforcement officer is SMC's chief engineer. Since the Village of Deerfield is a Certified Community, the Village of Deerfield's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO within the Village of Deerfield.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP. Enforce WDO.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **D.5 Public Information Handling Procedures**

The Village of Deerfield provides and publicizes a phone number that the public can use to submit information about stormwater-related problems and concerns. The Village of Deerfield documents and tracks the resolutions of problems and complaints reported by the public, including reports of soil erosion and sediment control issues on development sites. Since the Village of Deerfield is a Certified Community, the Village of Deerfield's designated enforcement officer is responsible for investigating reports of soil erosion and sediment control issues on development sites within the Village of Deerfield.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **D.6 Site Inspection/Enforcement Procedures**

Article VI of the WDO contains both recommended and minimum requirements for the inspection of development sites. Within certified communities, the community's designated enforcement officer is responsible for conducting these inspections; within non-certified communities, SMC's chief engineer is responsible for conducting these inspections. Per the ordinance, these inspections may be conducted by a community's designated enforcement officer at any stage in the construction process. For major developments, as defined by the WDO, the enforcement officer conducts site inspections, at a minimum, upon completion of installation of soil erosion and sediment controls, prior to the start of any other land disturbing activities, and after final stabilization and landscaping, prior to the removal of soil erosion and sediment controls. Since the Village of Deerfield is a Certified Community, the Village of Deerfield's designated enforcement officer is responsible for conducting site inspections within the Village of Deerfield.

Article VII of the WDO specifies the legal actions that may be taken and the penalties that may be imposed if the provisions of the WDO are violated. If development activities on a development site are not in compliance with the requirements of the WDO, the enforcement officer may issue a stop work order on all development activity on the development site or on the development activities that are in direct violation of the WDO. In addition, failure to comply with any of the requirements of the WDO constitutes a violation of the WDO, and any person convicted of violating the WDO may be fined.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP. Enforce WDO.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **E. Post-Construction Runoff Control**

As described above, Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County. The WDO, which is administered and enforced within the Village of Deerfield by the MS4, establishes standards for Post-Construction Runoff Control. Although the Village of Deerfield intends to share responsibility for the implementation of the Post-Construction Runoff Control MCM with the QLP, as outlined in this NOI, the primary responsibility for the implementation of the Post-Construction Runoff Control MCM lies with the MS4, as the Village of Deerfield is currently a Certified Community, as defined by the WDO.

### **E.2 Regulatory Control Program**

The WDO requires all applicants to adopt stormwater management strategies for controlling post-construction stormwater runoff on development sites. As outlined in Article IV, Section B.1 of the WDO, all applicants must adopt stormwater management strategies that minimize increases in stormwater runoff rates, volumes, and pollutant loads from development sites. Proposed stormwater management strategies must address the runoff volume reduction requirements described in Article IV, Section B.1.d of the WDO and must include appropriate stormwater BMPs to address the other applicable post-construction runoff control requirements of the WDO. As a Certified Community, the Village of Deerfield is responsible for the administration and enforcement of the WDO within the Village of Deerfield.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP. Enforce WDO.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **E.3 Long Term O&M Procedures**

The Village of Deerfield has developed long-term operation and maintenance procedures to help reduce the amount of pollution contained in post-construction stormwater runoff that enters the Village of Deerfield's storm sewer system. The procedures address both new and existing development.

The Village of Deerfield's long-term operation and maintenance procedures address new development via the WDO. The WDO requires that maintenance plans be developed for all stormwater management systems designed to serve major developments, as defined by the WDO. Such maintenance plans must include: a description of all maintenance tasks; an identification of the party or parties responsible for performing such maintenance tasks; a description of all permanent maintenance easements or access agreements, overland flow paths, and compensatory storage areas; and a description of dedicated sources of funding for the required maintenance. The WDO also requires that all stormwater management systems be located within a deed or plat restriction (e.g., easement) to ensure that the system remains in place in perpetuity and that access to the system is maintained in perpetuity for inspection and maintenance purposes. As a Certified Community, the Village of Deerfield is responsible for the administration and enforcement of the WDO within the Village of Deerfield.

The Village of Deerfield's long-term operation and maintenance procedures address existing development via an inspection and maintenance program. The Village of Deerfield periodically inspects all existing post-construction stormwater management facilities (e.g., detention facilities),

including those that have a maintenance plan (i.e., facilities located within developments regulated by the WDO) as well as those that do not (i.e., facilities located within developments pre-dating, and therefore not regulated by, the WDO), to identify any maintenance tasks and/or any repairs that need to be completed. Responsible parties are notified of the inspection results and of the need to complete any maintenance tasks or repairs.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP. Enforce WDO.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **E.4 Pre-Construction Review of BMP Designs**

As described above, a community's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO. This includes a review of the stormwater BMPs that will be used to meet the post-construction runoff control requirements of the WDO. Since the Village of Deerfield is a Certified Community, the Village of Deerfield's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO within the Village of Deerfield.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP. Enforce WDO.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **E.5 Site Inspections During Construction**

As described above, Article VI of the WDO contains both recommended and minimum requirements for the inspection of development sites. Per the ordinance, these inspections may be conducted by a community's designated enforcement officer at any stage in the construction process. For major developments, as defined by the WDO, the enforcement officer conducts site inspections, at a minimum, upon completion of installation of soil erosion and sediment controls, prior to the start of any other land disturbing activities, and after final stabilization and landscaping, prior to the removal of soil erosion and sediment controls. Since the Village of Deerfield is a Certified Community, the Village of Deerfield's designated enforcement officer is responsible for conducting site inspections within the Village of Deerfield.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP. Enforce WDO.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **E.6 Post-Construction Inspections**

As described above, Article VI of the WDO contains both recommended and minimum requirements for the inspection of development sites. Per the ordinance, these inspections may be conducted by a community's designated enforcement officer at any stage in the construction process, including

after final stabilization and landscaping, after the removal of soil erosion and sediment controls. For major developments, as defined by the WDO, the enforcement officer conducts site inspections, at a minimum, upon completion of installation of soil erosion and sediment controls, prior to the start of any other land disturbing activities, and after final stabilization and landscaping, prior to the removal of soil erosion and sediment controls. Since the Village of Deerfield is a Certified Community, the Village of Deerfield's designated enforcement officer is responsible for conducting site inspections within the Village of Deerfield.

*Measurable Goal(s):* Implement, and track progress of BMPs as described in the SWMP. Enforce WDO.

*Milestone(s):* The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

#### **F. Pollution Prevention/Good Housekeeping**

The Village of Deerfield is responsible for the care and upkeep of the general facilities, municipal roads, its general facilities and associated maintenance yards. Many maintenance activities are most regularly performed directly by staff; however from time to time contractors are employed to perform specific activities. The Village provides on-going education and training to ensure that all of its employees have the knowledge and skills necessary to perform their functions effectively and efficiently.

##### **F.1 Employee Training Program**

The Village of Deerfield's practice is to provide education and training to all of its employees to ensure that they have the knowledge and skills necessary to perform their functions effectively and efficiently. The purpose of the training program is to teach appropriate employees about the following: storm water characteristics and water quality issues; the roles and responsibilities of the various Departments, and individuals within these Departments, regarding implementation of the SWMP to consistently achieve permit compliance; activities and practices that are, or could be sources, of stormwater pollution and non-stormwater discharges; and, how to use the SWMP and available guidance materials to select and implement best management practices.

*Measurable Goal(s):* Implement, and track progress of BMPs as described in SWMP.

*Milestone(s):* The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

##### **F.2 Inspection and Maintenance Program**

The Village of Deerfield regularly inspects and maintains municipally owned or operated properties and infrastructure, including streets, parking lots, stormwater management facilities, storm sewers, landscaped areas, and maintenance facilities. A primary goal of the operation and maintenance program is to address municipal infrastructure repair and maintenance needs in a way that reduces the amount of pollution that collects or that is generated on municipally owned or operated properties. Consequently, the Village of Deerfield works to incorporate pollution prevention and good housekeeping into its day-to-day activities and operations.

## **ATTACHMENT B SUMMARY OF PROPOSED MS4 STORMWATER MANAGEMENT ACTIVITIES**

As part of its stormwater management program, the Village of Deerfield conducts a number of activities related to each of the six minimum control measures (MCMs) described in IEPA's General NPDES Permit No. ILR40. Please note that the current version of IEPA's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that IEPA will make to the new version of the Permit, the Village of Deerfield remains committed to performing activities related to each of the six MCMs described in the current version of the Permit. Following the expiration of the current version of the Permit on March 31, 2014, the Village of Deerfield plans to continue to perform a variety of stormwater management activities, as described in more detail below.

Please note that the Village of Deerfield has developed a Stormwater Management Program (SWMP), which describes the Village of Deerfield's stormwater activities in additional detail. The Village of Deerfield's SWMP can be viewed at [http://www.gha-engineers.com/ms4/ms4\\_deerfield/reports.html](http://www.gha-engineers.com/ms4/ms4_deerfield/reports.html).

Tracking forms are used to track the implementation of the BMPs described in the Village's SWMP.

### **A. Public Education and Outreach**

The Village of Deerfield conducts public education programs that inform the community of potential impacts to receiving waters and the contributions the public can make to reduce pollutants in storm water runoff. The Village of Deerfield utilizes a variety of methods to educate and provide outreach to the public about the importance of managing pollutants that could potentially enter the storm water system. The program includes the following activities:

- Distribute informational literature regarding storm water BMPs, water quality BMPs, and proper hazardous waste use and disposal,
- Include information on water quality and storm water in the Village of Deerfield newsletter distributed by the village,
- Attend/sponsor outreach activities to homeowners/property owner associations, commercial/industrial facilities, schools, and other events,
- Coordinate, publicize, and participate in SWALCO events, and
- Maintain the Village of Deerfield's website which offers links to additional educational information, and ways to contact Village of Deerfield personnel.

#### **A.1 Distributed Paper Material**

The Village of Deerfield actively pursues the acquisition of educational documents prepared by the Lake County Stormwater Management Commission, IEPA, USEPA, the Center for Watershed Protection, the Chicago Metropolitan Agency for Planning "CMAP" (previously Northeastern Illinois Planning Commission "NIPC"), the University of Wisconsin Extension, the Solid Waste Agency of Lake County (SWALCO), as well as other agencies and organizations. The Village maintains a list of available publications in the SWMP binder and on the Village website. The Village's telephone number is listed on all Village outreach publications to encourage residents to contact the Village with environmental concerns.

*Measurable Goal(s): Implement, and track progress of BMPs as described in the SWMP.*

*Measurable Goal(s): Provide educational presentations related to IEPA's NPDES Stormwater Program at MAC meetings.  
Upon request, provide educational presentations related to IEPA's NPDES Stormwater Program (e.g., "The Big Picture: Water Quality, Regulations & NPDES") to Lake County MS4s.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **A.3 Public Service Announcement**

A public service announcement related to IEPA's NPDES Stormwater Program will be included in SMC's quarterly newsletter, "Mainstream," at least once each year. SMC will coordinate with the Lake County Department of Transportation (LCDOT) to post watershed identification signage in watersheds where watershed planning or project implementation efforts have occurred or are occurring.

*Measurable Goal(s): Include public service announcement related to IEPA's NPDES Stormwater Program in its quarterly newsletter, "Mainstream," at least once each year.  
Post watershed identification signage in cooperation and collaboration with LCDOT.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **A.4 Community Event**

SMC regularly sponsors and co-sponsors educational and technical training workshops on a variety of stormwater management-related topics. Each year, SMC will sponsor or co-sponsor at least one workshop on a topic related to IEPA's NPDES Stormwater Program, such as soil erosion and sediment control, illicit discharge detection and elimination, or stormwater best management practices (BMPs) that can be used to protect and improve water quality.

*Measurable Goal(s): Sponsor or co-sponsor workshop on a topic related to IEPA's NPDES Stormwater Program.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **A.5 Classroom Education Material**

Upon request, SMC will contribute to the development and compilation of materials for inclusion in a stormwater education kit that can be distributed to local students and teachers and/or other local stakeholders. Additionally, upon request, SMC will provide information, materials, and training to local students and teachers and/or other local stakeholders interested in conducting storm drain stenciling.

*Measurable Goal(s):* Upon request, develop and compile materials for inclusion in a stormwater education kit.  
Upon request, provide information, materials, and training to local students teachers and/or stakeholders interested in conducting storm drain stenciling.

*Milestone(s):* SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

#### **A.6 Other Public Education**

SMC maintains a website that contains a variety of materials and resources related to stormwater management. The website includes webpages such as "National Pollutant Discharge Elimination System Stormwater Program," "Best Management Practices," "Projects," "Publications," "Watershed Management Plans," "Partnerships," and "Advisory Committees." These webpages provide information about IEPA's NPDES Stormwater Program, provide information about stormwater best management practices (BMPs), allow for download of stormwater management-related publications and documents, provide notices of upcoming meetings and ongoing projects, and provide links to a number of other stormwater management-related resources.

*Measurable Goal(s):* Maintain and update the portion of the SMC website dedicated to IEPA's NPDES Stormwater Program with resources such as model ordinances, case studies, brochures, and links.

*Milestone(s):* SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

#### **B. Public Participation/Involvement**

SMC will continue to support Lake County MS4s in the development and implementation of their stormwater management programs by performing activities related to the Public Participation/Involvement MCM, as described below.

#### **B.3 Stakeholder Meeting**

SMC is actively involved in watershed planning throughout Lake County. SMC believes that the watershed planning process cannot happen and will not be successful without the input, interest, and commitment of the watershed stakeholders. Watershed stakeholders may include municipalities, townships, drainage districts, homeowner associations, lakes management associations, developers, landowners, and local, county, state, and federal agencies.

*Measurable Goal(s):* Provide notice of stakeholder meetings on SMC website.  
Track number of watershed committee meetings conducted.  
Establish watershed planning committees for each new watershed planning effort.

*Milestone(s):* SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

#### **B.4 Public Hearing**

SMC coordinates and conducts public meetings as well as committee meetings that are open to the public. A monthly Stormwater Management Commission meeting is open to the public and involves the SMC Board of Commissioners, which includes six municipal representatives and six county board members.

The Technical Advisory Committee (TAC) was created in 1992 to assist in the development, review, and revision of the Watershed Development Ordinance (WDO) and the associated administrative policies and procedures. TAC is made up of representatives from the development, environmental, municipal, and consulting engineering fields. TAC meetings are held monthly or on an as-needed basis.

The Municipal Advisory Committee (MAC) is made up of municipal, township, drainage district, consulting firm, and county representatives. MAC has worked to discuss, coordinate, and collaborate on the implementation of IEPA's NPDES Stormwater Program. MAC will continue to meet quarterly or as needed to assist Lake County MS4s with the implementation of IEPA's NPDES Stormwater Program.

The Watershed Management Board (WMB) meets annually to make recommendations on stormwater BMP project funding. WMB members include chief municipal elected officials, township supervisors, drainage district chairs, and county board members from each district within each of Lake County's four major watersheds.

*Measurable Goal(s): Provide notice of public meetings on SMC website.  
Track number of meetings conducted.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **B.6 Program Involvement**

Consistent with Lake County's comprehensive, countywide approach to stormwater management, SMC serves as a Qualifying Local Program (QLP) for all Lake County MS4s. In this role, in 2002, SMC proactively formed the Municipal Advisory Committee (MAC) to provide a forum for representatives of local MS4s, which include municipalities, townships, and drainage districts, to discuss, among other topics, the implementation of IEPA's NPDES Stormwater Program. SMC will continue to facilitate quarterly MAC meetings and will continue to provide general support to Lake County MS4s as they continue to develop and implement their stormwater management programs. SMC will prepare an annual report on its stormwater management activities and will provide guidance to Lake County MS4s in preparing their own annual reports.

*Measurable Goal(s): Track number of MAC meetings conducted.  
Prepare annual report on Qualifying Local Program stormwater management activities.  
Prepare template for use by Lake County MS4s in creating their own annual reports.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **C. Illicit Discharge Detection and Elimination**

SMC will continue to support Lake County MS4s in the development and implementation of their stormwater management programs by performing activities related to the Illicit Discharge Detection and Elimination MCM, as described below. Note, however, that the primary responsibility for the implementation of the Illicit Discharge Detection and Elimination MCM lies with the MS4.

#### **C.2 Regulatory Control Program**

SMC provides local MS4s with model and example illicit discharge ordinances that prohibit all non-stormwater discharges, including illegal dumping, to the storm sewer system. Additionally, the WDO includes provisions that prohibit illicit discharges to the storm sewer system during construction (i.e., prior to final site stabilization) on development sites.

*Measurable Goal(s): Provide model and example illicit discharge ordinances to Lake County MS4s. Continue to administer and enforce the WDO.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **C.10 Other Illicit Discharge Controls**

SMC regularly sponsors and co-sponsors educational and technical training workshops on a variety of stormwater management-related topics. Each year, SMC will sponsor or co-sponsor an illicit discharge detection and elimination workshop or other training workshop related to IEPA's NPDES Stormwater Program and track the number of attendees that attend the workshop.

Additionally, as part of its public education and outreach efforts, SMC distributes informational materials throughout Lake County about the hazards associated with illegal discharges and the improper disposal of waste.

*Measurable Goal(s): Sponsor or co-sponsor and track the number of attendees at an Illicit Discharge Detection and Elimination workshop or other training workshop related to IEPA's NPDES Stormwater Program. Distribute informational materials about the hazards of illicit discharges and illegal dumping from "take away" rack at SMC and SMC website.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **D. Construction Site Runoff Control**

Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County, including requirements for construction site runoff control. SMC will continue to support Lake County MS4s in the implementation of the Construction Site Runoff Control MCM by administering and enforcing the WDO and performing other stormwater management activities, as described below. Note, however, that the primary responsibility for the implementation of the Construction Site Runoff

Control MCM in certified communities (i.e., communities certified by SMC to administer and enforce the provisions of the WDO) lies with the MS4.

#### **D.1 Regulatory Control Program**

The WDO is the regulatory mechanism that requires the use of soil erosion and sediment controls on development sites throughout Lake County. The soil erosion and sediment control provisions of the WDO are included in Article IV, Section B.1.j. of the ordinance. At a minimum, these standards apply to any development project that hydrologically disturbs 5,000 square feet of land or more.

SMC has also created a Designated Erosion Control Inspector (DECI) program. The purpose of the program is to facilitate positive communication between the permit issuing agency, whether such agency be SMC or a certified community, and the permit holder, by creating a single point of contact for the discussion and resolution of site soil erosion and sediment control issues and concerns. Furthermore, the program is intended to improve site conditions, minimize environmental impacts, and educate contractors, developers, and inspectors about the use of soil erosion and sediment control BMPs. It is worth noting that the DECI program was designed to closely mirror the inspection requirements of IEPA's General NPDES Permit No. ILR10.

*Measurable Goal(s):* Continue to administer and enforce the WDO.  
Continue to administer the Designated Erosion Control Inspector (DECI) program outlined by the WDO.

*Milestone(s):* SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

#### **D.2 Erosion and Sediment Control BMPs**

Article IV, Section B.1.j of the WDO specifies the soil erosion and sediment control measures that must be used in conjunction with any land disturbing activities conducted on a development site. It specifies the use of a variety of soil erosion and sediment control BMPs including: minimize soil disturbance; protect adjoining properties from erosion and sedimentation; complete installation of soil erosion and sediment control features prior to commencement of hydrologic disturbance; stabilize disturbed areas within 7 days of active disturbance; avoid disturbance of streams whenever possible; use controls that are appropriate for the size of the tributary drainage area; protect functioning storm sewers from sediment; prevent sediment from being tracked onto adjoining streets; limit earthen embankments to slopes of 3H:1V; identify soil stockpile areas; and utilize statewide standards and specifications as guidance for soil erosion and sediment control.

SMC has also prepared a Technical Reference Manual (TRM) to accompany the WDO. The TRM is used to guide the creation of development plans that are in compliance with the provisions of the WDO and provides detailed information on the use of soil erosion and sediment control BMPs. It is currently being updated by the Technical Advisory Committee (TAC).

*Measurable Goal(s):* Continue to administer and enforce the WDO.  
Continue to work on updates to the Technical Reference Manual (TRM) and toward publication of the updated document.

*Milestone(s):* SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

### **D.3 Other Waste Control Program**

Article IV, Section B.1.j of the WDO includes provisions related to the control of waste and debris during construction on development sites.

*Measurable Goal(s): Continue to administer and enforce the provisions of the WDO related to the control of waste and debris during construction on development sites.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **D.4 Site Plan Review Procedures**

A community's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO. Within certified communities (i.e., communities certified by SMC to administer and enforce the provisions of the WDO), responsibility for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO lies with the MS4; within non-certified communities, the designated enforcement officer is SMC's chief engineer. All designated enforcement officers must pass an exam in order to qualify to act as such. SMC administers this enforcement officer program, providing training on an as-needed basis to all enforcement officers to assist them in passing the exam, and maintains an up-to-date list identifying each community's designated enforcement officer. In addition to administering the enforcement officer program, SMC periodically reviews each community's WDO administration and enforcement records, using the results of such review to evaluate the performance of certified communities and designated enforcement officers.

SMC has also prepared a Technical Reference Manual (TRM) to accompany the WDO. The TRM is used to guide the creation of development plans that are in compliance with the provisions of the WDO and provides additional guidance on the administration and enforcement of the ordinance. It is currently being updated by the Technical Advisory Committee (TAC).

*Measurable Goal(s): Administer the Enforcement Officer (EO) program outlined by the WDO. Maintain an up-to-date list identifying each community's designated enforcement officer. Periodically review each community's WDO administration and enforcement records. Continue to work on updates to the Technical Reference Manual (TRM) and toward publication of the updated document.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **D.5 Public Information Handling Procedures**

SMC provides a number of opportunities for the receipt and consideration of information submitted by the public. SMC's Citizen Inquiry Response System (CIRS) documents and tracks the resolution of problems and complaints reported by the public. SMC's website provides information on "who to call" for various stormwater-related problems and concerns. An Interagency Coordination Agreement between SMC, the US Army Corps of Engineers, and the National Resources Conservation Service specifies that if any of these agencies receive a report of a soil erosion and

sediment control issue, they will relay such report to SMC. SMC will then investigate the report and prescribe appropriate corrective actions, sharing the results of such investigation with the property owner and any applicable local, state, or federal agencies. Within certified communities, such investigations are coordinated with the community's designated enforcement officer.

*Measurable Goal(s): Document and track the number of soil erosion and sediment control-related complaints received and processed by SMC.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **D.6 Site Inspection/Enforcement Procedures**

Article VI of the WDO contains both recommended and minimum requirements for the inspection of development sites. Within certified communities, the community's designated enforcement officer is responsible for conducting these inspections; within non-certified communities, SMC's chief engineer is responsible for conducting these inspections. Per the ordinance, these inspections may be conducted by a community's designated enforcement officer at any stage in the construction process. For major developments, as defined by the WDO, the enforcement officer conducts site inspections, at a minimum, upon completion of installation of soil erosion and sediment controls, prior to the start of any other land disturbing activities, and after final stabilization and landscaping, prior to the removal of soil erosion and sediment controls.

Article VII of the WDO specifies the legal actions that may be taken and the penalties that may be imposed if the provisions of the WDO are violated. If development activities on a development site are not in compliance with the requirements of the WDO, the enforcement officer may issue a stop work order on all development activity on the development site or on the development activities that are in direct violation of the WDO. In addition, failure to comply with any of the requirements of the WDO constitutes a violation of the WDO, and any person convicted of violating the WDO may be fined.

*Measurable Goal(s): Document and track the number of site inspections conducted by SMC.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **E. Post-Construction Runoff Control**

As described above, Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County, including requirements for post-construction runoff control. SMC will continue to support Lake County MS4s in the implementation of the Post-Construction Runoff Control MCM by administering and enforcing the WDO and performing other stormwater management activities, as described below. Note, however, that the primary responsibility for the implementation of the Post-Construction Runoff Control MCM in certified communities (i.e., communities certified by SMC to administer and enforce the provisions of the WDO) lies with the MS4.

#### **E.2 Regulatory Control Program**

The WDO requires all applicants to adopt stormwater management strategies for controlling post-construction stormwater runoff on development sites. As outlined in Article IV, Section B.1 of the

WDO, all applicants must adopt stormwater management strategies that minimize increases in stormwater runoff rates, volumes, and pollutant loads from development sites. Proposed stormwater management strategies must address the runoff volume reduction requirements described in Article IV, Section B.1.d of the WDO and must include appropriate stormwater BMPs to address the other applicable post-construction runoff control requirements of the WDO.

*Measurable Goal(s): Continue to administer and enforce the WDO.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **E.3 Long Term O&M Procedures**

The WDO requires that maintenance plans be developed for all stormwater management systems designed to serve major developments, as defined by the WDO. Such maintenance plans must include: a description of all maintenance tasks; an identification of the party or parties responsible for performing such maintenance tasks; a description of all permanent maintenance easements or access agreements, overland flow paths, and compensatory storage areas; and a description of dedicated sources of funding for the required maintenance. The WDO also requires that all stormwater management systems be located within a deed or plat restriction (e.g., easement) to ensure that the system remains in place in perpetuity and that access to the system is maintained in perpetuity for inspection and maintenance purposes.

*Measurable Goal(s): Continue to administer and enforce the WDO.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **E.4 Pre-Construction Review of BMP Designs**

As described above, a community's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO. This includes a review of the stormwater BMPs that will be used to meet the post-construction runoff control requirements of the WDO.

*Measurable Goal(s): Continue to administer and enforce the WDO.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **E.5 Site Inspections During Construction**

As described above, Article VI of the WDO contains both recommended and minimum requirements for the inspection of development sites. Per the ordinance, these inspections may be conducted by a community's designated enforcement officer at any stage in the construction process. For major developments, as defined by the WDO, the enforcement officer conducts site inspections, at a minimum, upon completion of installation of soil erosion and sediment controls, prior to the start of any other land disturbing activities, and after final stabilization and landscaping, prior to the removal of soil erosion and sediment controls.

*Measurable Goal(s): Continue to administer and enforce the WDO.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **E.6 Post-Construction Inspections**

As described above, Article VI of the WDO contains both recommended and minimum requirements for the inspection of development sites. Per the ordinance, these inspections may be conducted by a community's designated enforcement officer at any stage in the construction process, including after final stabilization and landscaping, after the removal of soil erosion and sediment controls. For major developments, as defined by the WDO, the enforcement officer conducts site inspections, at a minimum, upon completion of installation of soil erosion and sediment controls, prior to the start of any other land disturbing activities, and after final stabilization and landscaping, prior to the removal of soil erosion and sediment controls.

*Measurable Goal(s): Continue to administer and enforce the WDO.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **E.7 Other Post-Construction Runoff Controls**

Through the Watershed Management Board (WMB), SMC provides partial funding for flood damage reduction and surface water quality improvement projects. The WMB, which includes representatives from the Lake Michigan, North Branch of the Chicago River, Fox River, and Des Plaines River watersheds, meets annually to review potential projects and to make recommendations on stormwater BMP project funding. Members of the WMB include chief municipal elected officials, township supervisors, drainage district chairmen, and county board members from each district found within each of Lake County's four major watersheds. The goal of the WMB program is to maximize opportunities for local units of government and other groups to have input and influence on the solutions used to address local stormwater management problems. Previous WMB-funded projects have reduced flooding, improved surface water quality, and enhanced existing stormwater management facilities throughout Lake County.

*Measurable Goal(s): Conduct annual WMB meeting.  
Contribute funding to flood damage reduction and water quality improvement projects through the WMB.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

#### **F. Pollution Prevention/Good Housekeeping**

SMC will continue to support Lake County MS4s in the development and implementation of their stormwater management programs by performing activities related to the Pollution Prevention/Good Housekeeping MCM, as described below. Note, however, that the primary responsibility for the implementation of the Pollution Prevention/Good Housekeeping MCM lies with the MS4.

### **F.1 Employee Training Program**

SMC will assist Lake County MS4s with the development and implementation of their employee training programs by maintaining a list of known employee training resources and opportunities, making available a software-based employee training program, and providing, upon request, technical assistance to local MS4s in developing and implementing their employee training programs. In addition, each year, SMC will sponsor or co-sponsor a training workshop related to pollution prevention/good housekeeping or another workshop related to IEPA's NPDES Stormwater Program.

*Measurable Goal(s): Maintain a list of known employee training resources and opportunities. Make available the Excal Visual Storm Watch: Municipal Storm Water Pollution Prevention software-based employee training program. Sponsor or co-sponsor a training workshop related to pollution prevention/good housekeeping or another training workshop related to IEPA's NPDES Stormwater Program.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **F.5 Flood Management/Assess Guidelines**

In working toward meeting its primary goals of flood damage reduction and surface water quality improvement, SMC follows a set of stormwater management policies that were created to define its roles and responsibilities for stormwater management in Lake County. One of these policies is to integrate multi-objective opportunities (e.g., flood damage reduction, surface water quality improvement, environmental enhancement) into SMC-sponsored projects. In accordance with this policy, SMC will evaluate all SMC-sponsored projects for multi-objective opportunities.

*Measurable Goal(s): Track number of SMC-sponsored projects that are reviewed for multi-objective opportunities.*

*Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

*Measurable Goal(s): Implement, and track progress of BMPs as described in SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **F.3 Municipal Operations Stormwater Control**

As part of its pollution prevention/good housekeeping efforts, the Village of Deerfield has identified municipal activities and operations with the potential to cause stormwater pollution or result in a non-stormwater discharge (e.g., vehicle maintenance, winter roadway maintenance). Through its employee training and operation and maintenance programs, the Village works to incorporate pollution prevention and good housekeeping practices into these activities and operations.

*Measurable Goal(s): Implement, and track progress of BMPs as described in SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **F.4 Municipal Operations Waste Disposal**

Waste management consists of implementing non-structural (i.e., procedural) and structural pollution prevention and good housekeeping practices for handling, storing, and disposing of wastes generated by municipal activities and operations. Through its employee training and operation and maintenance programs, the Village of Deerfield works to incorporate these waste management practices into its day-to-day activities and operations to prevent the release of waste into the storm sewer system.

*Measurable Goal(s): Implement, and track progress of BMPs as described in SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **F.5 Flood Management/Assess Guidelines**

The SWMP describes the procedures and practices that can be implemented by the Village of Deerfield to effectively reduce the discharge of pollutants within storm water runoff and comply with Federal standards. Compliance with the plan is intended to protect water quality thus contributing flood management:

*Measurable Goal(s): Implement, and track progress of BMPs as described in SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

### **F.6 Other Municipal Operations Controls**

The Village of Deerfield has developed spill prevention, control, and cleanup procedures to prevent and respond to spills that result from municipal activities and operations. Through its employee training and operation and maintenance programs, the Village of Deerfield works to incorporate these spill prevention, control, and cleanup procedures into its day-to-day activities and operations to prevent the release of spills into the storm sewer system.

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s  
Summary of Proposed MS4 Stormwater Management Activities

*Measurable Goal(s): Implement, and track progress of BMPs as described in SWMP.*

*Milestone(s): The Village of Deerfield began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*
